Defender Garage Doors

When a secure side-hinged steel garage door is needed to protect your premises look no further than the Defender Safeguard.

Manufactured from 1.5mm galvanised steel and internal steel strengthening as standard. Frames are 2mm galvanised steel and have 2mm stainless steel thresholds making the Defender Safeguard side-hinged garage door a longer lasting, stronger door.

Filled with mineral wool and internal steel strengtheners for the ultimate insulation. Anti-jemmy flanges to the leading edge of the leaf also provide excellent jemmy resistance.

High Security

To provide excellent protection the door leaf is manufactured from two 1.5mm steel skins, folded and mechanically fixed to form a strong and rigid 45mm thick door leaf.

The 90mm frame is pressed from 2mm steel to form a single rebated profile. The special fast fit frame is able to compensate for most irregularities in the opening with 16no threaded fixing adjusters per doorset.

A range of hardware is available to suit each specific requirement including a range of locks, latches, lever handles and bolts.

Aesthetic Design

Available powder coated to any RAL and through incorporating the latest CNC technology and advanced tooling it is possible to create a contemporary or traditional design that will suit any style of property.

Advantages at a glance

- 1.5mm steel leaf
- Internal steel strengtheners
- Frames pressed from 2.0mm steel
- Fast fit frame
- Anti-jemmy flanges
- Available in any standard RAL colour
- Bespoke decorative finish
- Wide range of hardware available

Bespoke Quality

All of our doorsets are bespoke which means we can create to your exact specification, within budget, every time. No matter what you are looking for we have you covered. We can also create matching doorsets to create a truly stunning look for your property.

Hardware

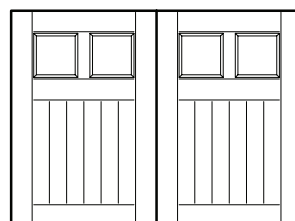

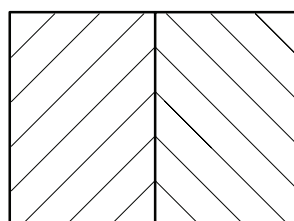

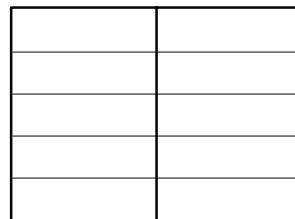

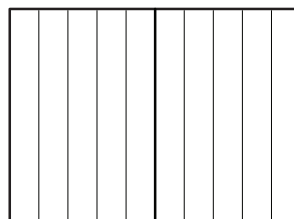

Door leaves are hung from 4no stainless steel hinges for smooth operation and optimum weather resistance. Security dog bolts secure the leaf into the frame if the hinges are attacked.

The doors can be held open with gas strut arms which ensures safe, controlled opening and closing whilst remaining strong in adverse weather conditions.

Additional hardware includes a range of locks, latches, lever handles, panic hardware, closers and stays.

Designs

Available in either the designs shown or create your own to match your requirements.

Structural opening sizes (mm)*

	Max width	Max height
Double leaf	2800*	2960

* With extended frame max width is 2940mm

**Made of
stronger
stuff.**
