

Energy & Sustainability Policy

This policy describes the framework within which Metador will conduct its activities in order to continuously reduce energy consumption and contribute towards global pursuits of sustainable development. Sustainable development is about wealth creation, environmental protection and social justice going hand in hand when taking decisions and planning for long-term benefits.

Improvement in energy efficiency:

Metador is committed to:

- Continuous improvement in the efficiency with which energy is used
- The prevention and avoidance of energy waste

Scope and boundaries:

Metador is committed to the principles of a sustainable development programme. It will progressively integrate these principles into its daily activities. It will seek to increase awareness of sustainable development within Metador and ensure wherever possible, its overall business activities support the achievement of our sustainable development objectives.

The policy applies to all of Metador's activities within the practices of security steel door manufacture and will seek to influence sustainable development activity with our clients and suppliers where possible. The Policy also describes how we aim to deliver and maximise sustainable development performance improvements

Sustainable development is the process by which we move towards sustainability and is about shaping our own future in ways which ensure a better quality of life for everyone, now and for generations to come.

"Development that meets the needs of the present without compromising the ability of future generations to meet their own needs"

Goals

- Monitor and measure the use of utilities in our offices
- Monitor and measure fuel consumption
- Replace equipment with A rated equipment where possible
- Source from local suppliers
- Use energy efficient bulbs
- Training and Awareness
- Reduce total energy consumption each year, taking account changes in business activities, weather and other relevant factors. Other objectives and targets will be set and reviewed from time to time.

Compliance

We undertake to comply not only with all relevant legislation relating to energy use, but also with additional voluntary requirements which may be agreed from time to time.

Signed by the Director with overall responsibility for Metador
